

The nail plug with metric connection thread "FIX-M" (anchor with cylinder head) made of pure nylon with galvanised threaded head screw nail is suitable for quick installations with high pull-out values in solid building materials. The area of application is, for example, the fastening of cable and pipe clamps with metric threads M6 & M8. The special head shape of the nail allows it to be driven into the anchor without damaging the metric thread.

Temperature resistance: -40°F to +176°F

Safety coefficient: 5
