

Technical data sheet

Bits Philips „PH-SLIM“

The "PH-SLIM" bit is used for professional applications. It achieves its quality through a milled screw holder and hardened and tempered S2 steel with a basic hardness of up to HRC 62. Optimised working and a long service life are achieved thanks to the high fitting accuracy of the bit in Phillips screws. The slim cross recess makes it particularly suitable for working with drywall screws with a Phillips recess.
